Corrections to Flash 8: Training from the Source.

Corrections to Flash 8: Training from the Source		
Page	**Correction to Be Made**	**What is being fixed**
v	Change first part of paragraph 3 to read: "Special thanks goes to the very kind, very patient, Robyn Thomas and Angela Kozlowski; to Nancy Sixsmith and Demian A. Holmberg for keeping me honest; to Carl Thien for his diligience;" and all of the other text from there is fine.	
1	Underneath the screenshot should be an artwork credit for Byron Regej	Credit was omitted since I thanked Byron in the acknowledgements section. However, it's important that he's credited here on page 1 under the screenshot. My reference to him in the acknowledgements section was personal. I want him to have the professional credit here, under the screenshot.
11	Tip: replace the text "double clicking" with "single-clicking"	In beta, you had to double-click. This is not true of the general release.
43	Paragraph 4 (excluding tip): Change the text "Edit>Guides>Edit Guides" to "View>Guides>Edit Guides"	Typo.
52	Step 2, paragraph 1, 2nd sentence: The W value should be changed to 779	The current value shows 770, which is the wrong width. It's meant to be a pixel smaller than the stage size.
73	Step 1, paragraph 1 change text "lesson02/start" to "lesson03/start"	Path error.
86	Step 1 second sentence: text "home" should be bold faced.	
86	Step 1, sentence 3, text "pages" should be bold faced.	These two are consistency issues. New layer names should be boldfaced.
88	Top of page, first paragraph. Add the line: "Also, when you added the Timeline effect, the home layer was renamed Drop Shadow by Flash. You will change that in the next step.	Clarity…readers may not be aware of the change.
88	Step 4 should read: rename the Drop Shadow layer to home. Lock the home layer and save your work.	Eliminates confusion in later steps.
100	Step 3: change the text "media folder" to "buttons folder"	Incorrect folder reference
100	Step 3, paragraph 1, sentence 1: changed text "media" to "buttons"	Incorrect folder reference.
106	Step 6: Button text should be initial capped, not all capped.	

Corrections to Flash 8: Training from the Source.

106	Step 6, Paragraph 1, sentence 1: text in parens should read "(Reviews, Tour, News, Feedback, and Map)" The text "...all in capital letters" should be removed.	The instructions tell the user to use all caps, but the source files and screen shots all show initial capped text.
108	Step 3: Second paragraph, second sentence: text "12-pixel" should read "120-pixel".	Incorrect ruler position is currently showing.
113	First part of Step 6 should read: "Lock the logo layer and unlock the glow layer." The rest of the instructions in the step are fine.	The glow layer is currently locked. The change to this instruction provides clarity.
114	First part of step 1 should read: "Unlock the menu layer." The remainder of the instructions are fine.	Again, this provides clarity.
118	First part of step 1 should read: "Select and unlock the buttons layer..." The remainder of the instructions are fine.	Clarity of instruction.
130	Paragraph 1, sentence one should read: "You'll add stop actions to keyframes 1, 11, and 20..."	
130	Paragraph two sentence 1 should read: Select keyframe 1 of your actions layer..."	
131	Paragraph 1, last sentence should read "Repeat these steps to add a stop action to keyframes 11 and 20 of the actions layer."	Stop action on keyframe one was for some reason omitted.
136	Step 5, paragraph 1, sentence 1 and 4: change the text "mcProductsMenu" to "mcProducts"	Incorrect symbol reference
150	new file with corrected names	Symbol names in starter file were incorrect.
163	Last paragraph, sentence one should read: "In the Load Graphic dialog box, type mmpresslogo.jpg..."	Directory reference was incorrect.
168	Tip, sentence two should read: "Open the Component Inspector panel by choosing Window>Component Inspector."	Path to panel was incorrect.
168	Tip, last sentence, word "Scheme" should be "Schema"	Incorrect word usage.
176	Step 2, first paragraph, first sentence: change the text "invisible layer button" to "invisible button layer"	typo
176	Step 3, Paragraph 2, should read: "Position your cursor so that it is blinking in it's own line underneath the stop action. You may need to press Enter after the stop action to make a blank space. Press the Script Assist button to turn Script Assist back on."	Instructions were incorrect.

Corrections to Flash 8: Training from the Source.

176	Step 3, paragraph 3, first line, change the text "In the Actions toolbox on the right" to "In the Actions toolbox on the left"	typo
206	Step 2, last paragraph on page, first sentence should read "The keyframe placement you will set to automatic."	Incorrect usage.
218	Step 3, paragraph 2, line 2. Change the text "UI Components" to "User Interface"	Incorrect reference.
223	Step 3, paragraph 1: Delete sentence 2, which reads "Use the W and H text fields in the Property inspector to change the location of the instance"	Incorrect instruction.
227	Second paragraph: Add "Select frame 1 of the actions layer and add a stop action.	This was accidentally omitted from the original text.
231	Step 4: Remove the text "Button" from the instructions.	
231	Paragraph 1, line 2: Remove the text "Button" from the sentence.	The Button component is already on the Stage at this point.
273	Step 5 should read: Copy catalog01.png and catalog02.png from the lesson09/assets folder on the CD-ROM into the TechBookstore folder on your hard drive.	HD Directory reference was omitted.
273	Step 6, paragraph 1, last line: Change the "autoScale" property to "scaleContent"	Wrong property referenced.
286	Step 3, first paragraph: Second sentence should read: "Because you changed the instance name for the component instance, you have to change any references to news_txt to home_txt in your ActionScript."	This is a clarity issue.
287	Note should read: The two image files are referenced within the HTML formatted text using the <img> tag in the home.txt file. The pre-created version calls the images from a directory called "assets." If you use the file from the CD-ROM, you will have to create an "assets" directory in your TechBookstore folder and move your images into it, or you will have to remove the references to the assets directory in the home.txt file.	Clarity issue.
324	Last paragraph, line 7: Change the word "generated" to "generate"	Improper usage.
