

## BDD Gherkin Template

**Feature:** <<feature title>> (<<feature description>>)

**Background:**

**Given** <<common precondition for all scenarios>>

**Scenario:** <<scenario title>> (<<outcome>>)

**Given** <<precondition>>

**When** <<trigger>>

**Then** <<observable postcondition>>

**And** << observable postcondition>>

**But** << observable postcondition>>

### Example

**Feature:** As a driver I want to renew my driver's license so that I can legally operate a motorized vehicle

Driver submits online application for license renewal along with vehicle emissions tests and payment information. Qualifying applications are approved and processed.

**Scenario:** Renew license for tested vehicle (Success)

**Given** that my insurance information is verified

**And** my vehicle has passed required emissions tests

**And** my payment information has been verified

**When** I confirm my license renewal application

**Then** I should see a confirmation that the payment was applied

**And** I should see my license status is active

**And** I should see my license expiration date extended for the renewal period

## Scenario Outline Example

Use a scenario outline for a group of scenarios that vary only in their data.

**Feature:** As a driver I want to renew my driver's license so that I can legally operate a motorized vehicle

Driver submits online application for license renewal along with vehicle emissions tests and payment information. Qualifying applications are approved and processed.

**Scenario Outline:** Successful renewals

**Given** that my insurance information is verified

**And** my vehicle has passed required emissions tests

**And** my payment information has been verified

**When** I confirm my renewal application on <start date> for <renewal period>

**Then** I should see a license expiration date of <expiration date>

**Examples:**

start date	renewal period	expiration date	
Jan 1, 2022	one year	Dec 31, 2022	
Jan 1, 2022	two years	Dec 31, 2023	
Dec 31, 2023	one year	Dec 30, 2024
