

# Index

## SYMBOLS

### **& (ampersand)**

- && (double ampersand) number comparison operators, 399
- shell background processing, 377

### **\* (asterisks), 146**

- \* operator (Python), 794
- /etc/passwd files, 336
- shell pattern-matching searches, 374
- wildcards, 662

### **\ (backslashes), 390**

- \' escape sequence, 816
- \" escape sequence, 816
- \\ escape sequence, 816

### **` (backticks), replacing strings with output, 390**

### **{ } (braces), 797**

### **[ ] (brackets)**

- [ ] operators, 812
- [global] section (/etc/samba/smb.conf files), 598-599
- [homes] section (/etc/samba/smb.conf files), 598-600
- [printers] section (/etc/samba/smb.conf files), 598-601
- [programs] section (/etc/samba/smb.conf files), 598-599

### **: (colons), as slices, 797**

- copying lists in Python, 796

### **\$ (dollar sign)**

- \$\* built-in variable, 387
- ## built-in variable, 387
- \$? built-in variable, 387
- \$0 built-in variable, 387

**= (equal sign), 814**

- == (double equal sign) string comparison operators, 396
- string expression operators, 391

**! (exclamation point), 333**

- != (is not equal) symbol, 575
- string comparison operators, 396
- string expression operators, 391

bangs, 333

- logical comparison operators, 395
- number comparison operators, 399

**< (greater than sign)**

- < operators, 397
- << (double greater than) here operator, 376
- <= (greater than or equal) operators, 397

**> (less than sign)**

- > operators, 397
- => (less than or equal) operators, 397

**| (pipes), 373, 968**

- | (bar) operators, 376
- || (double pipe)
- number comparison operators, 399
- string concatenation function, 574

**+ (plus sign) operators (Python), 794-795**

**# (pound sign)**

- # run-parts lines (/etc/crontab files), 370
- #! (she-bangs), 380-381, 769

**? (question mark), shell pattern-matching searches, 375**

**' (quotes)**

- " (double quotes), resolving variables in shell strings with embedded spaces, 388-389
- maintaining shell strings with unexpanded variables, 389

**/ (slashes)**

- /bin directory, 123
- /bin/sh files, user login process, 347
- /boot directory, 124
- /configs subdirectory (/usr/src/linux-2.6 directory), 975

- /dev directory, 124
- /dev/modem, 98
- /dev/null devices, 969
- /dev/zero devices, 969
- /etc directory, 85, 124-126, 128
- /etc/at.allow files, 369
- /etc/at.deny files, 369
- /etc/crontab files, 370
- /etc/cups directory, 300
- /etc/exports files, 595
- /etc/fstab files
  - implementing disk quotas, 348
  - mounting file systems, 955-957
  - options of, 594, 955-956
- /etc/group files, 329-330
- /etc/host.conf files, 478, 703
- /etc/hosts files, 456, 476-477, 704-705
- /etc/inittab files, 177, 356
- /etc/modprobe.conf files, 85, 469-470, 978-979
- /etc/nologin files, user login process, 346
- /etc/nsswitch.conf files, 477-478, 703-704
- /etc/passwd files, 325-327
  - GECO field, 336
  - list of, 337-338
  - system users, 337
  - user login process, 347
- /etc/pcmcia files, 86
- /etc/ppp/ppp-off files, 495
- /etc/ppp/ppp-on files, 495
- /etc/ppp/ppp-on-dialer files, 495
- /etc/printcap files, 300-301
- /etc/rc.d/init.d/httpd script files, starting/stopping Apache Web server, 531-532
- /etc/rc.d/rc.sysinit files, 354
- /etc/resolv.conf files, 478, 705
- /etc/samba/smb.conf files, 598
  - [global] section, 599
  - [homes] section, 599-600
  - [printers] section, 600-601
- /etc/services files, 477

- /etc/shadow files, 338-339, 347
  - /etc/skel files, 333, 347
  - /etc/squid/squid.conf configuration files, 693
  - /etc/sudoers files, 343-344
  - /etc/sysconfig/apmd files, 85
  - /etc/sysconfig/clock files, 85
  - /etc/sysconfig/hwconf files, 85
  - /etc/sysconfig/irda files, 85
  - /etc/sysconfig/keyboard files, 85
  - /etc/sysconfig/mouse files, 85
  - /etc/sysconfig/network files, 478-479
  - /etc/syslog.conf files, controlling system logging, 386
  - /etc/usertty files, user login process, 346
  - /etc/vsftpd.banned emails configuration files, 644
  - /etc/vsftpd.chroot list configuration files, 644
  - /etc/vsftpd.user list configuration files, 644
  - /etc/xen files, 520
  - /etc/xinetd.conf files, 363-364
  - /home directory, 47, 129
  - /opt directory, Linux file system hosting, 48
  - /proc directory, 129-130
  - /sbin directory, 123
  - /sbin/ifconfig, 472-474
  - /sbin/netstat, 475-476
  - /sbin/route, 474-475
  - /tmp directory, 48, 131
  - /usr directory, 131
    - Linux file system hosting, 48
    - subdirectories list, 167-168
  - /usr/bin directory, 167
  - /usr/include directory, 167
  - /usr/lib directory, 167
  - /usr/lib/modules directory, 168
  - /usr/lib/X11 directory, 168
  - /usr/sbin/ftpsht files, scheduling FTP server downtime, 664-665
  - /usr/sbin/smbd command. *See* smb daemon, starting
  - /usr/share/doc directory, software package documentation, 139-140
  - /usr/src/linux-2.6 directory
    - /configs subdirectory, 975
    - arch directory, 976
    - Documentation directory, 975
    - kernel source code, 976
    - kernel testing programs, 976
    - scripts directory, 976
    - sound card documentation, 271

  - /usr/X11/man directory, 168
  - /var directory, 48, 131
  - /var/log/vsftpd.log configuration files, 644
  - /var/log/wtmp files, monitoring user logins/logouts, 335
  - /var/log/xferlog files
    - fields, list of, 666-667
    - FTP servers, viewing server transaction logs, 666-667
  - /var/spool/cron directories, 371
- ~ (tilde), 145

## NUMBERS

- 00-INDEX files, 975**
- 10BASE-T, 464**
- 64-bit Fedora, 22**
- 100BASE-T, 464-465**
- 1000BASE-T, 465**

## A

**-a logical comparison operators, 395**

**a2p command, 786**

**a2ps command, 303**

**AbiWord (GNOME Office), 252-253**

**abiword command, 259**

**ac command, 335, 349**

**accept command, 303, 311, 622**

**access control directives (ftppaccess configuration file), Wu-FTPd server configuration**

anonymous user access, limiting, 647

classes

defining user classes, 648

restricting number of users in, 649

invalid password entries, limiting number of, 650

permissions

limiting individual ID-based permissions, 649

restricting Group ID-based permissions, 649

servers, blocking host access, 648

**access permissions (files), changing via chmod shell command, 905**

**access points, wireless network security, 877**  
**accounts**

Fetchmail, 682-684

root accounts

creating, 74

remote server security, 512

user accounts

adding users, 334-335

chgrp command, 328

chmod command, 328

chown command, 328

command-line tools, 332-333,  
349-350

disk quotas, 348-349

/etc/passwd files, 325

/etc/skel files, 333

Fetchmail, 682-684

file ownership, 326

file permissions, 327-328

GIDs (group IDs), 327

granting system administrator privileges, 341-346

locking users out of, 333

login process, overview of, 346

monitoring user activity, 335-336

MySQL, adding to, 580

PAM (Pluggable Authentication Modules), 339-340

passwords, 336-341

regular users, 326

root users, 326

standard users, 327

stereotypes, 328

super-users, 326

system users, 327

UIDs (User IDs), 327, 341-343

usernames, 335

viewing, 326

websites, 350

**ACID (Atomicity Consistency Isolation Durability), database compliance comparisons, 577**

**ACL (access control list), 693-697, 734-735, 937**

**actions (PHP loops), 824**

**active files (INN), 760-761**

**ad blocking via caching nameservers, 714**

**Add a New Print Queue configuration dialog (system-config-printer tool), 306**

**add-on prefixes/postfixes, 659**

**addresses**

address-based virtual hosts, 551

broadcasting, 463

IP addresses

dotted quad IP addresses, 701

IP masquerading, 460

limitations, 459-460

netmasks, 459, 462-463

network classes, 458-459

Squid proxy server, 698

- network file systems, 938-939
- optimizing, 888-890
- partitions
  - mounting as read-only, 964-965
  - supported types, 938
- references, 970-972
- relocating, 959-961
- structure of, 936-938
- sync command, 888
- test file systems, creating/mounting, 962-964
- viewing, 121-123, 940
- virtual file systems, 129
- XFS, 939, 944

## files

- access permissions, changing via chmod shell command, 905
- attributes, viewing from inodes, 937
- comparisons (comparison of expression), 394-395, 398-399
- compressing, 146-147
- contents, printing via cat shell command, 902-903
- conversion, configuring FTP server file-conversion actions, 658-661
- copying
  - cp command, 441, 905
  - FTP, 442
  - mc command-line file management software, 441

- multiple files between servers, 511
- remote files, 510
- rsync command, 444-445
- rtools, 442
- scp command, 442-443
- SFTP, 443
- tar command-line backup software, 439-440
- uucp, 442
- with scp, 442
- current directory, listing in via ls shell command, 914-916
- decompressing, 146-147
- deleting. *See also* files, recovery; files, undeleting
  - immutable files, 937
  - via rm shell command, 918
- handles, 833
- immutable files, 937
- integrity, verifying in ext3 disk file systems, 943
- linking via ln shell command, 912-913
- managing
  - for character devices, block devices, and special devices, 967-969
  - via shell, 145-146
- moving via mkdir shell command, 917
- multiple files, copying between servers, 511
- paging through output via less shell command, 910-912
- permissions, 151, 327
  - assigning, 152
  - chgrp command, 328
  - chmod command, 328
  - chown command, 328
- PHP functions, 832-834
- printing last lines via tail shell command, 918
- recovery, 446-447. *See also* files, deleting
- restoring from backup via tar command-line backup software, 434-435

- searches
  - find shell command, 907-909
  - locate shell command, 914
- sharing. *See* NFS (Network File System), Samba
- transfers, 631-633
- undeleting, 446-447. *See also* files, deleting
- Files section (xorg.conf configuration file), 169-170**
- filesize() file function, 834**
- file\_get\_contents() file function, 832**
- file\_put\_contents() file function, 832**
- filtering spam, 763**
- find command, 155-156, 433, 907-909**
- find2perl command, 786**
- finger command, displaying user information, 137**
- finger information fields (/etc/passwd files), 336**
- Finish and Create New Print Queue dialog (system-config-printer tool), 308**
- Firefox web browser (Mozilla), 210-211, 565, 692**
- firewalls, 78, 881-882**
- FireWire (IEEE-1394) drives, 111-114, 431**
- firstboot, 78-80**
- Flash plug-in (Macromedia), 279**
- flastmod directive (SSI), 560**
- flat file databases, limitations of, 568**
- flexbackup backup software, 439**
- float data types, 811**
- floating-point numeric values, Python, 791**
- floppy disks**
  - backups, dd command, 437
  - drives, creating DOS file systems for, 953
  - Linux distribution websites, 1005
  - system boots, GRUB, 450
- Floppy Formatter (KDE), mounting file systems, 957-958**
- flow control (Apache Web server dynamic content), 561**
- focus policy, 181**
- fopen() file function, 832-833**
- for loops, 824**
  - Perl, 776
  - Python, 798-799
- for statements, 400-401**
- foreach loops, 824-825**
  - Mono, 863
  - Perl, 776
- format command, creating FAT disk file systems, 950**
- formatting**
  - Calc spreadsheets, 249-250
  - file systems, high-level formatting, 950
  - Writer documents, 246-247
- forward lookups, 709**
- forward zones, 725-727**
- forwarding email via Sendmail, 677-678**
- fphosts files, allowing/denying FTP server connections, 661-662**
- FQDN (fully qualified domain names), 707**
- fread() file function, 833**
- free backup software websites, 439**
- free command, 129, 374, 418**
- free memory, displaying, 418**
- FROM clauses, SELECT statements, 573**
- fromhost parameter (innd.conf), 756**
- fsck command, 943, 970**
- fsize directive (SSI), 560**
- fstab files, 125, 594**
- FTP (File Transfer Protocol), 625**
  - commands list, 667
  - copying files, 442
  - Fedora installation, 44, 58
  - ftp.kernel.org, 982
  - graphics-based client interface

## P

### packages

- choosing, 74-76
- dvd+rw-tools, 265-266
- installing, 74-76
- installed packages, listing, 1001-1002
- joystick\*.rpm, 90
- kernel-xen-guest, 517
- lm\_sensors, 103
- software package documentation, 139-140
- vnc, 517
- xen, 517

### packets

- browsing, 880
- filtering, 882
- writing, 266

### paging through file output via less shell command, 910-912

### PAM (Pluggable Authentication Modules), 339-340

### pan command, 763

### Pan news client, 226-228

### parallel port cameras, documentation, 288

### paravirtualization, 516

### parted command, 970

- Fedora installation, 46
- partitions, editing, 950

### partition tables

- creating, 947
- editing, 947-950
- manually restoring, 448-449

### partitions

- creating, 66-68
- hard disks/drives, creating file systems, 950-952
- IDE partitions, fdisk command, 947
- mounting
  - read-only, 964-965
  - relocating file systems, 960-961
- planning, 55

supported types, 938

zip disks, 947

### passive command, 644

### passwd command, 155-157, 333, 350

### passwd files, 125, 325-327, 336-338

### passwd.nntp files, 754

### passwords, 877

- batch password changes, 341
- bootloaders, 877
- brute-forcing, 511
- /etc/passwd files, 336-338
- FTP users, 639-640
- GRUB, 358
- LDAP root users, assigning to, 743
- MySQL root users, 579
- PostgreSQL database users, creating, 584
- root passwords, creating, 73-74
- selecting, 340-341
- shadow passwords, 338-339, 639-640
- system password policies, 336

### pasting, 133

### patch command, 857, 984

### patched kernels, 980, 983-984

### patches

- binary patching, 516
- networks, 505

### PATH environment variable, 142-143

### PATH lines (/etc/crontab files), 370

### pathhost parameter (innd.conf), 756

### pathnews parameter (innd.conf), 756

### pattern-matching, 373-375. *See also* wild-card searches

### pbm command, 304

### .pbm graphics file format, 294

### PCI (Peripheral Control Interface) devices, power-management configuration, 103

### pci=biosirq command, hard disk optimization, 886

### PCMCIA cards

- PCMCIA Card Services software, 107-108
- removing/inserting, 109
- troubleshooting, 108-109

**pcmcia files, 86**

**PCRE (Perl-Compatible Regular Expressions) functions, 836**

**.pcx graphics file format, 294**

**PDF documents, reading, 24**

**pdksh (public domain Korn shell), 372, 379**

- comparison of expression
  - file comparisons, 394-395
  - logical comparisons, 395-396
  - number comparisons, 392-394
  - string comparisons, 391-392
- select statements, 404
- test command, 391
  - file comparisons, 394-395
  - logical comparisons, 395-396
  - number comparisons, 392-394
  - string comparisons, 391-392

**PEAR::DB (PHP), 838-840**

**performance tuning**

- Apache web server, 891-892
- file systems, 888-890
- GNOME desktop environment, 891
- hard disks
  - benchmarks, 885
  - BIOS adjustments, 886
  - file system adjustments, 888-890
  - hdparm command, 886-887
- KDE desktop environment, 891
- Linux kernel, 890
- MySQL
  - measuring key buffer usage, 893-894
  - query caches, 894-896
  - query optimization, 896-897
  - read buffers, 896
  - table caches, 896
- references, 897
- SQL statements, 896-897

**peripherals, configuring, 128**

**Perl**

- #! (she-bangs), 769
- appeal of, 767
- books about, 786

code examples

- command-line processing, 785
- one-liners, 784-785
- posting to Usenet, 784
- purging logs, 783
- sending email, 781-783

command-line errors, troubleshooting, 769

conditional statements, 774-775

development of, 767

functions

- die, 783
- use, 780

IRC resources, 788

looping constructs, 776-778

modules

- loading from CPAN, 780-782
- Mail::Sendmail, 782-783
- standard modules list, accessing, 780

operators

- comparison operators, 772
- compound operators, 773
- math operators, 773
- miscellaneous operators, 773-774

perldoc command, 770

perlfunc document, accessing, 770

regular expressions, 778-779

related Fedora and Linux commands, 786

sendmail command, 781

shell access, 779-780

simple programming example, 768-770

string constants, 774

system logging, 768

Usenet resources, 787

variables

- arrays, 770-771
- hashes, 770-771
- scalars, 770
- special variables, 771

versions of, 768

website resources, 787

**perldoc command, 770**

**perlfunc documents, 770****permission control directives (ftpaccess configuration files), Wu-FTPd server configuration, 655-657****permissions, 151, 327-328**

- assigning, 152
- directory permissions, 153-154
- file access permissions, changing via chmod shell command, 905
- FTP users, assigning for, 639
- group permissions, 328-330
- OpenLDAP files, 746
- sgid (set group ID) permissions, 155-156
- suid (set user ID) permissions, 155-156

**Personal Desktop, installing, 21****pgaccess command (PostgreSQL), 591****.pgm graphics file format, 294****pg\_ctl command (PostgreSQL), 591****Photoshop (Adobe), 286****PHP (PHP Hypertext Preprocessor)**
