

ERRATA

Page 93: Any time you switch page orientations (when creating/editing layouts, entering data, or generating a report), the orientation (landscape or portrait) remains in effect until you manually choose another orientation in the Page Setup dialog box or until a script executes that contains a Print Setup step that sets a new orientation. After you finish creating the Stock Report layout, you should choose File > Page Setup and reset the orientation to portrait.

Page 106, Step 9, 3rd sentence:
"Select the Tab button..."
Should read,
"Select the colored block under the header..."

Page 117, 1st table
Add another row under the Go to Layout row:
